REP-119 · Release 1.22.0 (rules version 19): publishing on the owner's word

Game	Fruit Market 1.22.0, rules version 19. Live before it: 1.21.0 (rules 18)
Report date	2026-11-13 15:56 (Asia/Kuala_Lumpur)
Type	Release
Request	Owner, 2026-11-13: "publish"
Approval	DEC-117, approved. Published by the release path in CLAUDE.md; if a required check fails nothing is published and the owner is told

1. What 1.22.0 holds

Package	What players see
PLAN-095 (DEC-113, DEC-114)	Standing orders allow a bid $2 higher and need a $2 smaller stake (blueberry $11 and $4, watermelon $14 and $6, apple $13 and $5, mango $20 and $10). The buttons say Home and Wardrobe
PLAN-098 (DEC-115)	The evening is one shared step: everyone builds and plays evening cards at once, then taps Lights out. Several Priority cards can be played; the stall earliest in the line-up goes first and the others go back to their hands
PLAN-099 (DEC-116)	One round table from Open my stall to the end of the rush: crates go to their seats, a black square for each piece a rival put out, pricing with the table in view, the bell in the middle, crates opening one by one, Favoured Trade asked in the middle, the rush at the same table

The rules version goes from 18 to 19: a phone still on 1.21.0 is asked to update before it joins a room; a game saved under rules 18 starts again with a notice; progress, trophies, stamps and looks are kept (tests). Not in this release: the text pass (PLAN-097, waiting for the owner's choices) and the small gaps (PLAN-096, waiting for approval).

2. Checks before publishing

Check	Result
`npm run verify` on the merge `8ef525d` (895 tests)	PASS
`npm run test:e2e`	PASS on each part's branch (PLAN-095 on `955f63a` ; PLAN-098 on `74f10a8` ; PLAN-099 on `3a5ee2e` , 0 leaks, longest task 171 ms against 200); the whole is run by CI on the pull request and on main
CI on the pull request and on main (`verify:full`)	to run
Deploy workflow: verify, release check, deploy, live smoke test, tag `v1.22.0`	to run

Check	Result
Played by people on 1.22.0	NOT RUN (the owner, once live)

3. Known gaps

- The printed rules sheet and update pack still describe rules 18's evening and standing-order numbers (printing paused, DEC-105); the printed cards show the new numbers.
- On the smallest phone with six stalls the pricing – and + are 34 to 36 px tall, under the 40 px guide.
- The merge `c1b41cd` is recorded under the author "Claude" instead of the owner's name; left as it is (pushed, later work built on it).
